IIITBONE

EXPLANATION AND DEMO

Please look at the detailed explanation and demo video to walk through the project.

https://www.youtube.com/watch?v=yLyamBgmdCw

DOCUMENTATION

For the documentation, please refer to the Readme.md file in the repository. Here is the link for the same:

https://github.com/nitheezkant/iiitbONE/blob/master/readme.md

TECH STACK

The Django framework is used in the backend. For the database management system, SQLite 3 has been used.

For the front end, Bootstrap 5, HTML, CSS and JS have been used.

MOTIVATION

The motivation to do this came because of the need for an easy access system to college resources felt by all students. This project will make it easy both for up-loaders and students who want to use it. The burden of maintaining the one drive links no longer lies on just one person. So more seniors will feel easy to upload resources.

FUTURE ASPECTS

As an open-source project, it is expected that there will be contributions by many people to the future of this. The idea for further development has been listed in the idea list. The link to it is:

https://github.com/nitheezkant/iiitbONE/blob/master/idea_list.md
